

EMAIL ARCHIVING AND FILTERING SERVICES

CONCORD COMPUTER CONSULTING, INC. - CCCI
A ROBUST EMAIL ARCHIVING AND FILTERING SOLUTION

Intel resellers have been providing hardware for their small-medium business customers' needs for decades. Now with their expanded IT services offerings, they are uniquely positioned to provide customers with a complete solution for their IT needs. This new service offering is backed by Intel's quality and brand promise.

There are a few distinct challenges associated with email and instant messaging becoming a core means of business communication. The proliferation of its usage has the potential to slow down email systems and there are various regulatory and legal requirements that organizations must comply with - with respect to retrieving and producing documents.

Even if your organization is not yet required to archive email, a proactive approach to storing and indexing messages makes good business sense. Whether it's the ability to provide relevant documents in legal disputes, or the capability of retrieving messages years after they were deleted, a cost-effective, turnkey solution can provide the protection you need.

A COMPLETE EMAIL ARCHIVING AND FILTERING SOLUTION

We can help you avoid managing the complexity and expense of assembling an archival solution yourself. A complete solution requires capturing and indexing messages, creating offsite storage, and implementing reporting tools. You could invest in purchasing all of these components and then devote IT resources to build a solution ...or you can choose a proven end-to-end archiving and filtering service.

Our Service intercepts your messages at the gateway, creating a store of email and instant messages. Whether your individual staff members delete a message or file it for future use, the message is stored and indexed in the archive in case you ever need to retrieve it. You can even set the server to proactively notify you of messages with specific kinds of content. In addition, our services are designed to comply with federal regulations and meet the needs of the legal system.

KEY FEATURES OF OUR ARCHIVING AND FILTERING SERVICES

There are many advantages in using our Email Archiving and Filtering Service. They include:

- Full-text search and retrieval on all parts of a message, including attachments
- Content monitoring and filtering
- Random sampling of mail for regulatory review
- Pro-active real-time alert to compliance and HR managers when suspicious email is sent
- Spam blocking and virus protection
- Effortless restoration of deleted email
- Automatic appending of disclaimers to outbound email
- 100MB of email archived for 36 months

THE VALUE OF OUR EMAIL ARCHIVING AND FILTERING SERVICES

As part of our complete Managed Messaging Services, you can use our Service in a hosted environment. Our solution eliminates the difficulty of meeting regulatory compliance and legal requirements. And most importantly, when you need access to your archive, it's easy to find and retrieve messages.
