

HOSTED MICROSOFT SHAREPOINT SERVICES

CONCORD COMPUTER CONSULTING, INC. - CCCI
A COLLABORATIVE TOOL TO HELP BUSINESSES INCREASE PRODUCTIVITY

Intel resellers have been providing hardware for their small-medium business customers' needs for decades. Now with their expanded IT services offerings, they are uniquely positioned to provide customers with a complete solution for their IT needs. This new service offering is backed by Intel's quality and brand promise.

To be successful, organizations must always find ways to be more productive - to improve processes, to communicate more effectively, and to share information more efficiently. This is challenging in and of itself. In an environment where teamwork can be your competitive advantage, you need to utilize any tool that will contribute to your success.

OUR HOSTED MICROSOFT SHAREPOINT SERVICES

Our Hosted Microsoft SharePoint Service helps organizations become more productive. It provides easy access to various kinds of information - project documents, contact lists, completed tasks, and project calendars, to name a few. The Service facilitates versatile version control over documentation - alerting team members of new revisions and making sure they use the most up-to-date documents. It also enables teams to coordinate schedules, create and share site templates, and track project deliverables.

In addition, our Hosted Microsoft SharePoint Service comes with administrative measures already in place - so you can control who accesses, edits, and uploads documents. We also implement security measures, such as firewalls, to protect your critical information.

KEY FEATURES OF OUR HOSTED MICROSOFT SHAREPOINT SERVICES

There are many key features that come with our Hosted Microsoft SharePoint Services. They include:

- Single sign-on with Hosted Microsoft Exchange
- Full compatibility with Microsoft Office Applications

- Storage space fits various size requirements - starting at 2GB per site
- Anti-virus protection
- Simple user-interface for Superuser (e.g. project leader) to access and customize the site
- Access from anywhere on the Internet
- SSL network security for secure data transfer
- Team collaboration templates included
- Firewall protected

THE VALUE OF OUR HOSTED MICROSOFT SHAREPOINT SERVICES

Our Hosted Microsoft SharePoint Services provide many benefits to our clients. Having a central location makes it easier to manage and find critical information. This results in increased productivity and more efficient workflow. Version control reduces redundant work and promotes smoother project management. The ability to share items, such as project tasks and calendar events, keeps team members on the same page throughout the duration of a project.

The Service is scalable to grow with your business and flexible to fit your individual needs - all at a competitive price.
